

Small GA Aircraft Operations at Logan Airport

Are you a pilot that flies into BOS in a small aircraft? Have you ever wanted to land at BOS but didn't because of the size and complexity of the operation? Join us for a practical discussion between pilots and controllers that will demystify landing and departing BOS. Topics will include BOS runway configurations, parallel runway operations, wake turbulence, delays, tips from experienced pilots/controllers, and a pilot/ATC Q&A. Don't miss this exclusive event. Click on the link below and register TODAY.

Directions: Exit 7E or 7W off Route 3. Follow signs for the college. Turn onto Charron Ave, turn right on Pine Hill Rd. University Drive is the second right after the fire station. Take first left between the dorms and the athletic field (College Ave) and follow the road around to the right for parking. Eaton Richmond Building is to the right.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
